

d) Linguistic Diversity of India

(N. Dey) state that India has one of the largest plethora of languages and this diversity can be analysed in spatial, historic, cultural milieus.

SPATIAL REPRESENTATION :-

Historic Dimension :-

(M. Bhasin) said that "waves" of migration have caused the linguistic diversity:-

- 1) 1st wave due to Negrito migration (but such are not found in those region)
- 2) 2nd wave intermixed with the autochthonous group (causing AUSTRO ASIATIC)
- 3) Dravidian languages may have emerged due to ELNO speakers from West Asia.

④ Rural migration from East Asia, China may have led to formation of Tibeto group.

Cultural Diversity:-

Dravati Karve divided regions of India in terms of language. She studied each linguistic area and found unique kinship and family patterns, thus showing diversity.

Education and Policy:-

The New Education Policy of India noted diversity in Indian languages. It said AI and machine learning technologies with ANTHROPOLOGICAL INPUT can help in DIGITAL INDIA SMARTER APPLICATIONS.

Loss of languages: Recently AKA-BONO speaker died. The UNESCO survey predicts that various languages like Malto are endangered.

Using anthropological devices: the LIVING TONGUES INSTITUTE is reviving 'koro' language with ultrasound and descriptive linguistics.
