(b) Holistic and atomistic approach

Holistic approach refers to study ~~the~~ of society through all perspectives and incorporating diverse cultures.

Atomist approach refers to study of society partly ~~is~~ or separately in compartments

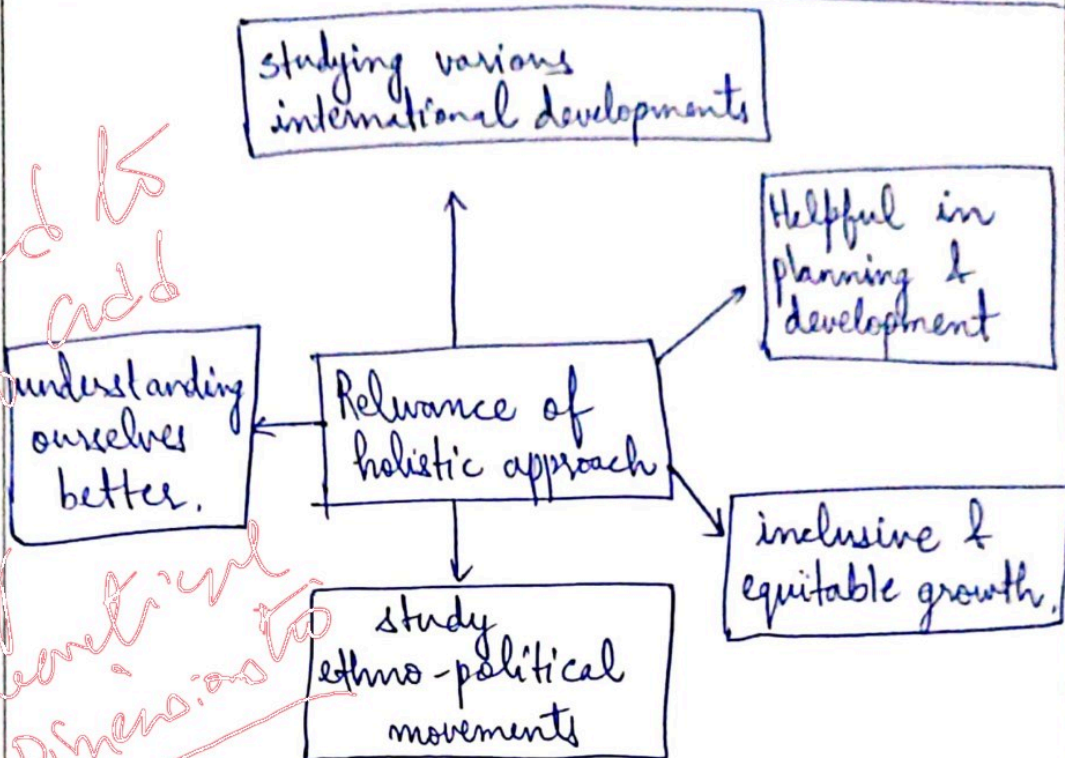

~~Holistic~~ approach is mostly used in anthropology while atomistic approach is used in other social sciences like history, economics.

Clarke ~~holistic~~ approach incorporates a total view by interlinking various concepts ~~and~~ which others may miss.

any
theoretical
dimensions to

For eg: Malinowski in 'Argonauts of Western Pacific (1922)' holistically studied culture of Trobriand islanders.

Holistic approach holds very much importance and has become hallmark of anthropology
