Q4. (a) Outline the history and development of Anthropology as a distinct discipline based on rationality and scientific temper 20

Anthropology is the holistic study of man in its totality across time & space.

TK Penniman in his book '100 years of Anthropology (1935)' talked about development of anthropology.

1) Formulatory phase (Before 1835)

- It refers to views given by various scholars like Socrates, Plato and Aristotle ~~is~~ during ancient greek period. about society.

2) Convergent Period (1835-1859)

- refers to the period where modern development of subject took place when August Comte coined the word 'sociology'

3) Constructive Period (1859-1900)

- Scholars like LH Morgan, EB Tylor and Fozer gave the theory of unilinear evolution (classical evolutionism).
- This led to the introduction of anthropology in Oxford university.
- In 1859, Charles Darwin through his work 'On the Origin of species through Natural selection (1859)' laid the foundation of biological evolution.
- Later the first systematic fieldwork was conducted by WHR Rivers during his Torres expedition (1899).
- LH Morgan also did extensive fieldwork and gave the evolutionary scheme of marriage and also contributed to kinterms.

4) Critical Period (1900-35)

• Radcliffe Brown through his fieldwork among 'The Andaman Islanders (1907)' came up with theory of structural functionalism.

• Similarly, Malinowski through his fieldwork among Trobriand islanders released 'Argonauts of Western Pacific (1922)'. He devised the theory of functionalism and participant observation which later became hallmark of fieldwork tradition.

Post 1935, many anthropologists came up with different studies. Robert Redfield gave the concept of little and great tradition, folk-urban continuum.

- For first time, anthropology was not restricted to tribal societies, rather it started studying peasant as well as urban societies.

- Post WW-II, various new branches in anthropology came into being. like
 - social biology
 - kinanthropometry
 - Population genetics
 - psychological anthropology

With fast changing world with phenomenon like industrialisation, urbanisation & modernisation, There is great opportunity for anthropologists to study this ever changing society.
