(b) The Scope of Anthropology

Anthropology is the holistic study of man in totality across time and space.

Herskovits - Anthropology is the science of man and its culture.

Relevance of Anthropology

- 1) Understanding human differences & their adaptations to various environments.
eg: Ecological anthropology
- 2) Understanding ourselves better. → resolving inter-group conflicts through cultural relativism.
- 3) Applied and Action anthropology to implement better policies.
eg: Tribal sub plan formulated by 'Expert committee on Tribal Development' headed by LP Vidyarthi & SC Dube.
- 4) Preserving & protecting tribal culture
- 5) Village & Tribal development.

Anthropology as a discipline takes immense pride in its contribution towards the betterment of society.
