Q1.

a)

Archaeological anthropology is the study of material remains, antiquities and past.

History, started in late 19<sup>th</sup> century, earlier restricted to study of fossil, primates, race. But, after 1930s expanded scope to genetics and socio-cultural studies.

Scope The archaeological anthropology is sub-categorised into

- helps to know culture of past  
for example - sickle tell about iron  
age → cultivation → social  
patterns and habitation
- to trace origin and evolution  
for ex - Australopithecus fossil study
- Ethnoarcheology - study by Brian Hayden  
on manufacturing of Queen of  
Mesamericans to trace primitive culture

Relevance → to know culture patterns  
→ to know human behaviour  
and changing mind patterns  
for ex - development of tool during  
evolution

Contemporary

With coming of GIS tools, genetics  
DNA study archaeology has  
been manifested into interdisciplinary  
field.
