(b) Discuss with examples the ethnoarcheological survivals and parallels among hunting-gathering societies in India

20

The concept of ethnoarchaeology was given by
Jesse Fawkes in 1901.

Lawman (2001) defines ethnoarchaeology as
the technique which involves studying present
with an objective of historical reconstruction
of past

1) EB Tylor in 'Primitive culture' defined cultural survival as the element of ~~same~~ culture continuing from the past when it originally developed.

2) Cultural parallel $\Rightarrow$ refers to culture practices that were followed parallelly by two or more societies which ~~had~~ may or may not have cultural contact.

Examples

1) Juangs of Odisha

- They in their sacred temple worshipped the eternal fire which has been lit since

thousand years.

- Juangs believed somewhere in past, ~~these~~ this fire was lost, however they regained it by placing a log of wood.

- As per Mahapatra, this is culture survival

2) Onge of Andamans

- They have the practice of burying dead with microliths. However, ~~they~~ there have been no mesolithic site in Andamans.

- This is a culture parallel as ~~less~~ this practice was widely followed during prehistoric times.

3) Chenchus of Andhra Pradesh

- ~~But Prof Bhattacharya~~ through archaeology perspective, neolithic ash mounds were used for living purpose
- However studying present day Chenchus, it can be inferred that these mounds were used to store valuable items. This is cultural survival
