

5.c) Oral history and its relevance

Oral history refers to the method of transmission of the knowledge, information and folk culture to next generation through oral process.

### Relevance of the oral History

- ① It gives us the knowledge and learnings of the old tradition.
- ② Shows the resilience of the little traditions, how they are passed.
- ③ It also gives us the knowledge that how much sharp their memory used to be, so that they passed the knowledge from one generation to the other.

- ④ They also showcase their Cultural continuity.
- ⑤ It helps them to manage and balance their social structure.
- ⑥ It gives us the importance of tribal knowledge of Medicine, Conservation and various herbs.

### Examples of oral history

- ① Oaxaca Community oral history studied by Carole Marwan found that they had knowledge about herbs for menstruation, miscarriage and pregnancy.
  - ② Asura tribe had history of knowing types of Iron - Pala, Bichi, Gota.
- Thus, the oral history had lot of relevance in the research method.
