(c) Puberty

Puberty or adolescence is a stage of human growth characterized by development of reproductive organs in males & females.

Hormone change

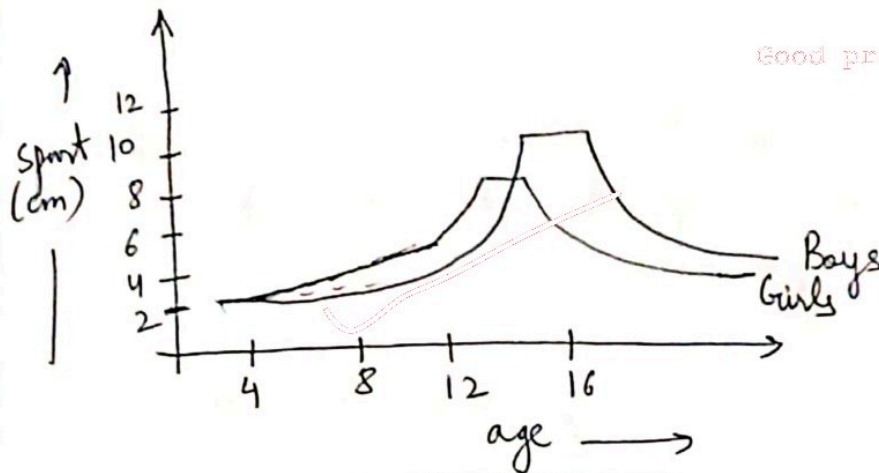

Physical changes

Menarche is clear sign of puberty among girls.

- 1) Puberty in girls occurs 2 years earlier than boys.
- 2) It is characterised by spurt in height. & Spurt in boys is 10 cm while in girls is 8 cm.

Other changes

Boys

- 1) development of testes, penis, scrotum
- 2) change in voice
- 3) width of shoulders increase

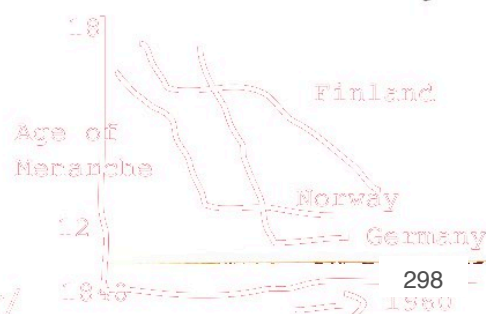

Girls

- 1) Development of vagina, uterus & mammary glands.
- 2) occurrence of breast buds.
- 3) width of pelvis increases.

Puberty has wide ranging changes among both boys & girls. It is largely associated with full development of ~~sex~~ reproductive organs.

You need to mention studies on Puberty.

Age of Menarche decreasing across populations
