2)

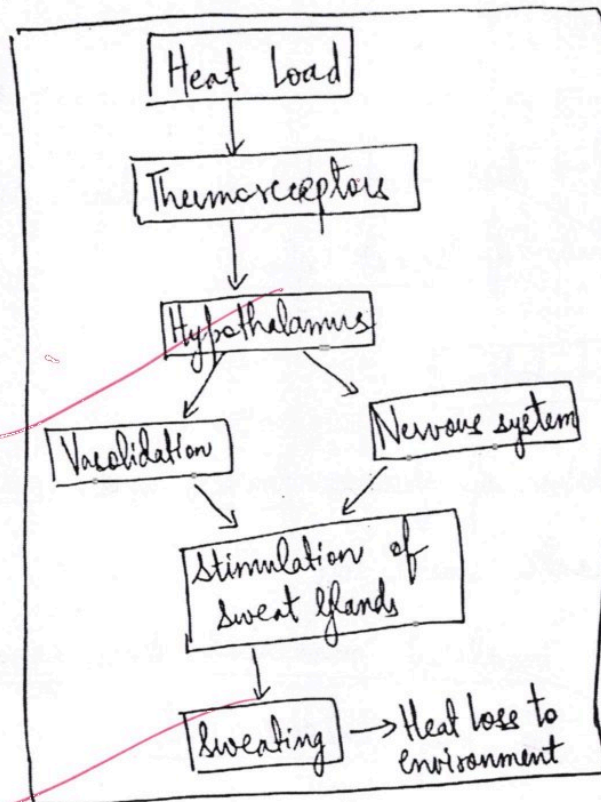

Fig: Acclimatization.

3)

Adaptation

Allen rule → those living in warmer climate have longer appendages to increase heat loss (Masai of Africa)

Bergmann rule → those living in warmer areas have lighter weight. eg: Pygmies of Africa

- 4) Infants → less heat tolerance due to inactivation of sweat glands

Cultural Adaptation

- 1) High intake of ~~glucose~~ glucose and water to compensate sweat loss.
- 2) Use of insulated material like gobar in India to keep indoor cool.
- 3) Use of light clothing to ensure proper air flow.
- 4) Use of ~~modern~~ air conditioners and coolers in modern societies.

Due to increased phenomenon of climate change and global warming, heat adaptation ~~is~~ can pose a challenge to tribal communities.
