(b) Applications of Forensic Anthropology

As per CC Snow (1976), forensic anthropology is the application of anthropologists specialised knowledge to the problems of medical jurisprudence.

Facial reconstruction

As the question is about application you need to explain these points

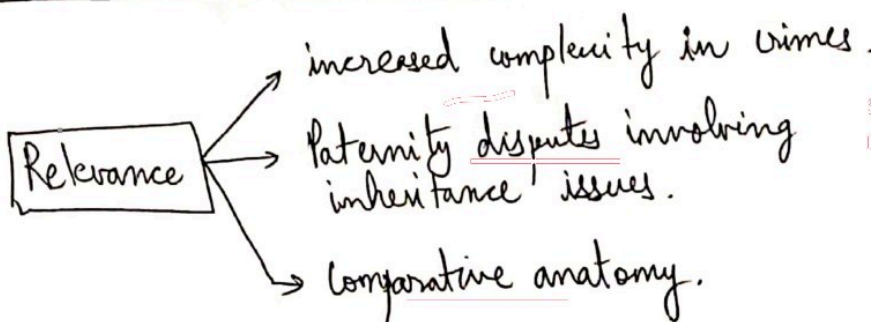

For example

The angle between the inferior pubic is acute (70 degrees) in men, but obtuse (90-100 degrees) in women.

estimation of age from sternum fusion

Draw pelvic diagram

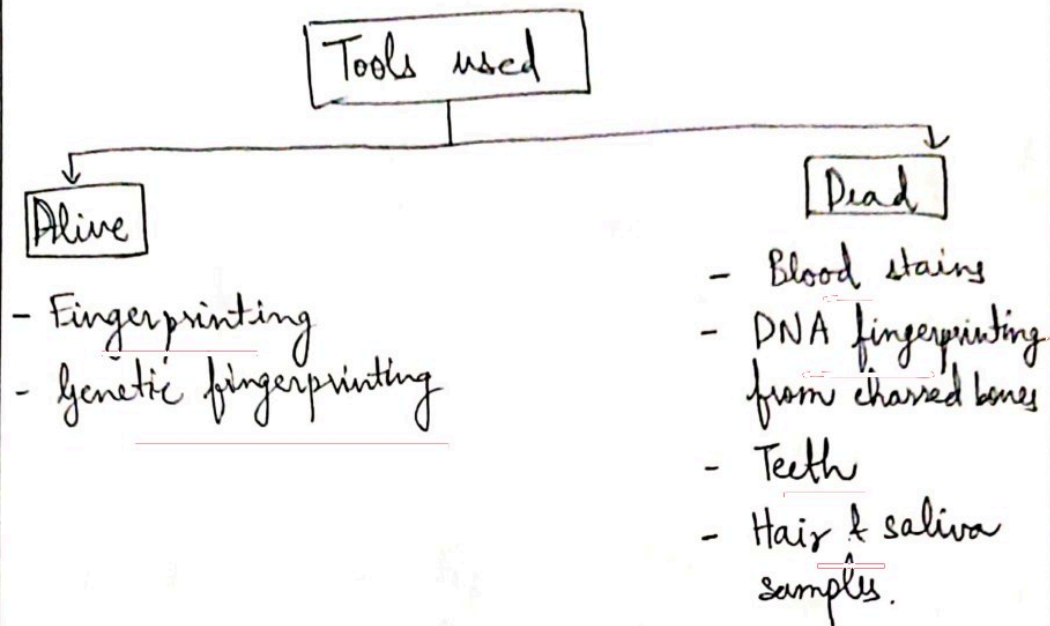

Suspect DNA

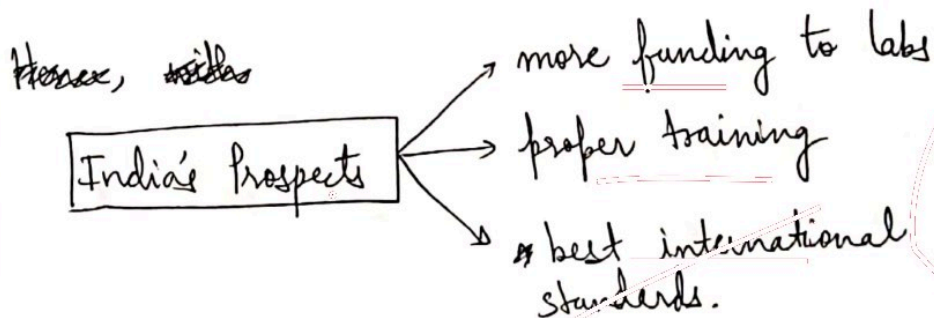

Crime scene DNA

* The famous Tandoor case (1971) ~~murder~~
was solved with help of forensic anthropologists.

Hence, forensic anthropology has immense
applications in various sectors.
