Selection & monitoring of sports person

- 1) There is a correlation between the physique of a person and sports.
eg: Usain Bolt with leaner physique able to run very fast.
- 2) Moorehouse & Rasch (1964) gave a combination of physique & sports

<u>Stature</u>	<u>Physique</u>	<u>Sports</u>
Tall	Heavy	Wrestler
	Medium	Basketball
	Light	Tennis.

- 3) ~~With the~~ Kinanthropometry also takes help of osteology, genetics. For eg:
ACTN 3 gene is good for elite performance in athletics.

- 4.) Anthropology also takes into account various psychological, mental, physical needs of sports person - thereby following a holistic approach.
- 5.) Dr Sachindra Narayan redesigned hockey sticks for tribes of Chota nagpur area.
- 6.) A culture approach to anthropology of sports implies sports is a universal culture among society.

The government is also taking help of anthropologists to recognize talent in sports in India by conducting tournaments. Hence, role of anthropology in selection & monitoring of sports person is immense.

Mention some recent studies from India

case studies done by Chatur M.S (2003) on selection of Basketball players in India
