

FACTORS RESPONSIBLE

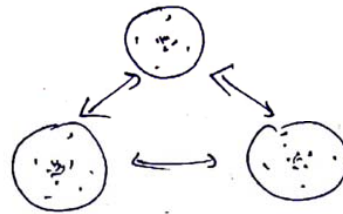

- ① porous borders
— movement of people

- ② Diffusion due to
like mindedness of
people

- ③ Rudra

What flows

— Ideas, knowledge,
culture, traditions
eg] Diwali celebration in
white house

Wicker's culture
and concept

Food, clothing, best
practices

ANTHROPOLOGICAL ANALYSIS

- ① Functionalism : Only those cultural traits
flow and survive which have certain
utility in the society
ie As per Malinowski, — cultural
fossils (survivals) don't exist,

⑪ Culture Materialism → This school says that change in infrastructure is the sole reason for adoption of cultural traits.

ie only those traits accepted which hold economic significance

⑫ Structural functionalism → traits that disrupt the social structure are often rejected

↳ This can be seen in tribal protests when their natural man spirit complex is disrupted (Prof LP vidyasthi study) and an outside culture is imposed.

while cultural flow is increasingly happening, we must ensure that majority culture's forced imposition is not allowed. As per CF Model, culture is a way of life and must be allowed to interact organically.
