

experience their social & financial freedom. e.g. No value for Care economy

③ "Validation authority" from the religious scriptures further strengthens the gender stratification in society.
e.g. Concept of women as men's property in Hinduism & Islam.

④ Presence of "greater political power" available to men further hampers the political aspirations of women; thereby giving women minimum role in bringing social legislations for societal change. e.g. Sec 375 of IPC = Marital rape allowed.

⑤ Support from the women folk themselves to such stratification further

Strengthens the subjugation of women.
e.g. Girl being scolded by mother for
late arrival.

Reasons for near universality of male
dominance across societies :-

- ① universal fact of women being "agency
of child birth" restricts her social
mobility
- ② Greater male dominance can be reflected
even in religious scriptures. e.g.
"Eve" coming to birth from the Rib's
of "Adam".
- ③ Greater Physical strength of male;
no one dares to question male authority
on fear of domestic violence.

- ④ Design of social structures are centered around male dominance -
e.g. Patrilocal marriage is prevalent in nearly 60% of societies
& Matrilineal is only in 7%.

Although since Ancient times; female Subjugation is a norm; Recent times have shown a new found energy where in women are demanding equal rights in social relations; equal economic opportunities, equal sharing of home chores. Such demands can be reflected in wave of feminist movements which have come up after regular intervals in order to safeguard women rights & responsibilities in society.
