

1.d) Matrilineal Puzzle

Descent as per Murdock is allocation of individual to consanguineal kinsmen. Matrilineal Descent refers to allocation to line of mother.

Here property is inherited as follows →

However, such societies are not matriarchal → which means authority truly is held by associated male members.

•) When this male is also brother → matrilineal societies are built around brother-sister relation.

•) Here → brother faces the dilemma over residence due to his role conflict of

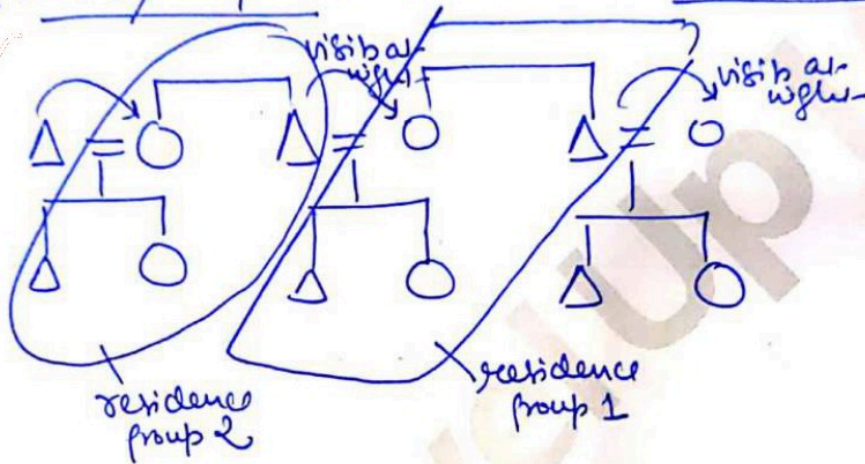

Natural love for biological son

v/s

Fatal responsibility towards sister's son

- 2) Thus either the brother resides at his sister's house or at his ^{=> visiting husband system} or his wife's house ^{=> permanent husband system}

[Case 3] Nayaras - Maravadi - Kakkal Goyls

- This creates tensions for the male members due to conflict. $\rightarrow$ He is associated with his biological son before puberty and sister's son after ^{puberty} ~~puberty~~. However this conflict is avoided in case of Goro, Khasi matrilineal societies as authority is exercised by husband.

Thus, this dilemma and toxic situation is matrilineal puzzle which has its roots in patriarchal setup despite matrilineality.
