

(Don't Write anything in this Area)

1.c) Household and domestic group

Haviland (2003) defines household as a unit living together but not necessarily connected by blood or affinity.

Ex) Mundurucu tribe in Amazon where all females and children below 13 years live together.

All men and male child above 13 years live together.

Domestic group as defined by MEYER FORTS householding group which provide material and cultural resources to maintain and bring up its members.

HOUSEHOLD	DOMESTIC GROUP
1) Members consist of family members and may be non-family members too.	1) Members are related purely by blood or by affinal ties.
<u>Example</u> : Nuclear family living with domestic help.

2) Household not permanent, members can move out.

3) Household has to live under same-roof.

4) No rules of succession applies.

5) Not necessarily common belief in culture, religion.

2) Domestic group permanent. Members cannot quit the family.

3) Domestic group may be scattered.

Example different family members living separately due to different obligations

4) Rules of succession applies

5) Common beliefs like culture, religion

Similarities

1) Both are a form of social group which performs supportive functions.

2) Both household and domestic group may have rules to be adhered to.

3) Economic transaction happens in both.

Thus household and domestic group shares few similarities and few dissimilarities but both caters to wellbeing of the member.
