

(Don't Write anything in this Area)

- 2.b) Briefly describe the factors responsible for decline in marriage in the world and also give Anthropological interpretations of live-in relationships.

(20 marks)

WESTERMARCK defines marriage as an institution or a union between a man with one or more women which is recognized by custom or law and which involves certain rights and duties both in case of parties entering the union and in the case of children born into it.

The institution of marriage is universal. However in present time, we see decline in marriage in world.

Factors responsible for decline in marriage

- 1) Industrialization, Urbanization
- 2) Modern education.
- 3) Freedom and financial instability.
- 4) Live in relationships, gay marriages.

Industrialization :

- Modern societies and economies struggle in settling down with marriage.
- Promotes individualism, appetite for growth.

Modern education

- Increased marriage age.
- changed perception of marriage from religious and customary practice to secular.

Financial instability :

- Many societies view marriage and starting a family as expensive.

② Korea and Japan

Freedom

- Primacy for self growth.
- Industrialization and urbanization promotes such values.

Urbanization

- Increases the role of secondary groups like peers.

Live in relationships

- gaining prominence in the society.
- legal acceptance in few countries including India.

- New Forms of Marriage : like gay marriage not having legal recognition.
