(c) Theories of Origin of Families.

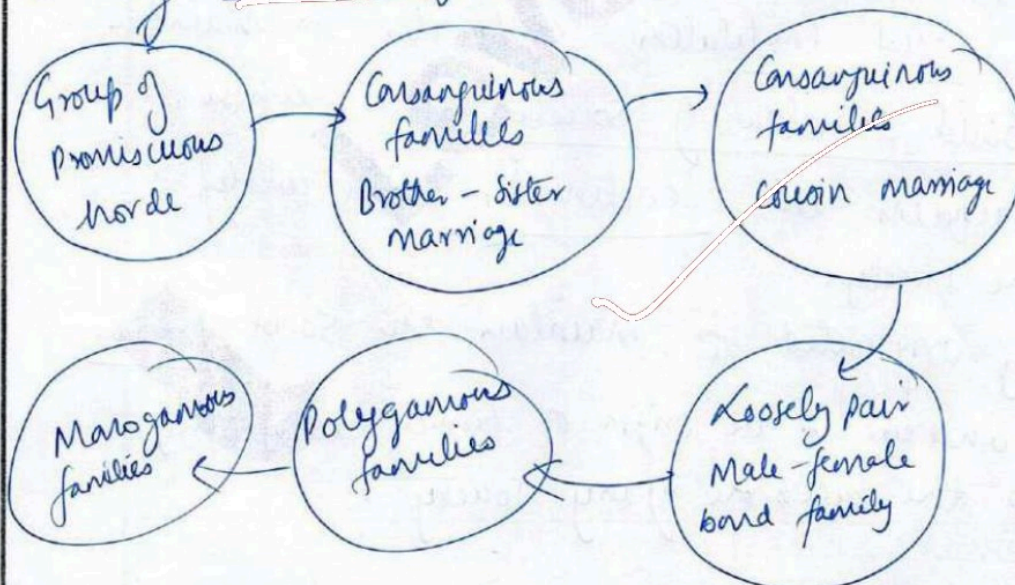

(10 Marks)

Family is defined by Dr. G.P. Murdock in his book 'Social Structure' as →

A social group which is marked by residential cohabitation, economic cooperation and reproduction. ~~It has members~~ At least two members are of different sex and produce children own or adopted.

Theories of origin of families →

① By Dr. L.H. Morgan in his book 'Ancient Society'

Dr. L.H. Morgan saw the constitution of family in evolutionary perspective. Dr. Al Frober has

Criticised this scheme has having Ethnocentric bias.

① Functionalist perspective → According to Dr. Malinowski Every social institution is present to fulfill a psychological need / function.

Dr. GP Murdock has ~~present~~ noted the functions of family as production of offspring, economic cooperation, etc.

To fulfill these functions family was originated.

Similarly, Dr. Radcliff Brown opines that every social institution contributes to maintain the social structure of society as a whole. It maintains the continuity and unity in the society.

Family originated to maintain this social structure.

Hence, whatever be the origin of family today they act as the backbone of any society.
