(c) What is kinship system? Discuss its relevance in understanding the social structure of society 15

Kinship system is a nomenclature that assigns status and roles to a particular individual that directs and control the behaviour of relatives of human.

Hurdock classified kinship system into 6 categories ÷

- 1) Eskimos: all lineals and laterals are called by classificatory terms.
- 2) Hawaiian: simplest type, no sex distinction
- 3) Iroquois: lineals from either parentage called by same term
eg: Fa Br → Father
Mo Si → ~~sister~~ mother.

4) Omaha: all matrilineal cross cousin and patrilineal cross cousin same term

↳ no generational distinction

5) Crow: matrilineal mirror image of Omaha type

6) Sudanese: different term for every person.

Relevance in understanding social structure

1) It helps to ~~devi~~ understand different statuses and relationship.

For eg: father has ~~the~~ more status than son.

2) Lapier - kinship system helps to understand various social process

↳ For eg: Iroquois type emerged due to practice of levirate and sororate

- 3) Helps to know superiority of the relationship.
eg. grand father termed as 'dada'
- 4) We can understand the strength of relationships.
- 5) Radcliffe Brown → kinship system helps to understand the social structure of society.
- 6) WHR Rivers → kinship system helps to know various marriage and customs that are not in practice today.

Hence, kinship system affects the social relationship in a society. With changing society, kinship system around world are also changing.
