(c) Matrilineal Descent Groups

Matrilineal descent groups is the group where descent is traced through mother's line.

eg: Nayars of Malabar

Δ = male
 $\circ$ = female
 $\square$ = siblings
 $= \rightarrow$ marriage.

~~After~~ Although descent traced through mother, the real authority rests with mother's sister brother. Thus it can be said that power is transferred from mother's brother to her son.

Functions of matrilineal descent groups

- 1) Regulation of marriage
- 2) maintaining social order in society
- 3) Facilitating inheritance and succession.

- 4) Economic cooperation
- 5) Religious function
- 6) Promoting peace and harmony.

The patrilineals play an important role in ~~matrilineal~~ by providing facilities to their children and performing rites de passage

Hence matrilineal descent groups facilitates smooth ~~power~~ political and economic transition between generations through female line.
