(d) Residence patterns

Residence patterns refers to the place where ~~married~~ couple resides post marriage

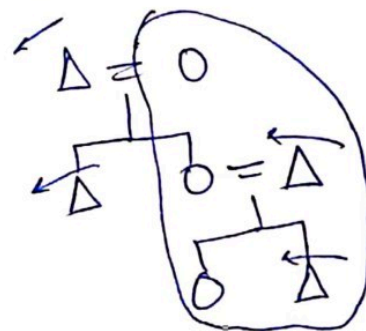

Different types of residence patterns are:

- 1) Patri lateral residence : couple resides at groom's home. If it stays near groom's family, then it is called virilocal
- 2) Matr lateral : couple resides at bride's family. Opposite of virilocal is uxorilocal. If they stay at bride's maternal uncle then it is called avunculocal

patri lateral

eg: Nagas

matr lateral

eg: Nayers.

- 3) Bilocal: residing at both groom's and bride's family from time to time.
eg: Kwakiutl of British Columbia.
- 4) Ambilocal: Bilocal is not feasible. Hence, after some the couple decides to stay at one place. It is called ambilocal.
- 5) Neolocal: residing at completely new place. eg: modern industrial societies.

Various factors like prestige of profession, division of labour, nature of economy, demography and political factors affects the residence patterns.
