

- (c) Briefly discuss the characteristics of Food Producing Societies with appropriate examples. (15 marks)

Food Collection and Food Producing societies

are two main means of subsistence found. Food Producing societies refer to ~~some~~ ones which rely on food production and/or livestock farming for subsistence.

Examples :

- ① Pastoralist: Masai of Kenya, Todas of Nilgiri.
- ② Horticulture: Arapesh, Ao Nagas.
- ③ Agriculture: Baiga, Gonds, Munda.

Characteristics

I Demography

① Life style : Pastoralist : Nomadism .

- ↳ Horticulture : Sedentary life .
- ↳ Agricultural : Sedentary, large settlements .

② Population Density : Pastoralist : Low .

- ↳ Horticulture : Higher than Pastoralist
- ↳ Agricultural : Very High .

II Main Practices

↳ Pastoralist : Subsistence farming, livestock farming, food processing, transhumance .

↳ Horticulture : Horticulture, fruits and vegetable farming, small scale .

↳ Agricultural : Crop cultivation using Plough and/or Modern techniques .

(II) Economy (1) Ownership: Pastoral: Herd is private, grazing lands community owned.
↳ Horticulture: Private or community.
↳ Agriculture: Usually private.

(2) Surplus and Trade: Pastoral: Livestock products are usually exchanged.
↳ Horticulture: Low production, usually not surplus.
↳ Agriculture: Surplus is present.

→ In contemporary aspect, this strict division is largely absent and the societies show more than one characteristic at once. Moreover with growth of service sector economy, new kind of subsistence practices are coming into picture too.
