10

Do not
write
anything in
this margin

Horticulture refers to growing food crops like vegetables and fruits with very simple technology.

Tribes practising

- 1) India - Munda, Santhal, Oron, Bhil
- 2) Worldwide - Kachin of Myanmar, tribes of southeast Asia.

Features

- 1) Use of primitive technology like - digging stick and hoe.
- 2) Marked by Division of labour - where men do farming and women contribute in reaping harvest.

3) Simple system of consumption and
distribution

- with increased cultural contact, tin cans
and plastic containers to store produce.

4) Political organisation - present to regulate
the surplus and maintaining ~~low~~ order &
stability among tribes.

Impact of culture contact

Increased globalization led to adoption of new
techniques like new HYV seeds, and irrigation

~~None~~ surplus sold in agricultural market
has led to increased earnings.

Infiltration of big landlords and moneylenders
led to their exploitation and culture
clashes.
