(e) Culture Area Concept

Culture Area concept was given by Wissler and Kroeber under the theory of diffusionism.

• Culture area concept argues that there are several traits in a culture area which get diffused and exchanged between various culture areas.

• Culture center is the concentration of various traits in a culture area, where various ideas in form of traits get concentrated, as a result of which culture area is formed.

- There is diffusion between various culture area such that it facilitates exchange of ideas and spread of cultural traits.
- American diffusionists argued that culture area gives rise to diffusion of various cultural traits.

Criticism

- 1) Confusion over defining the boundaries of culture area.
- 2) Inability to explain the extent of culture area concept.

Despite criticism, culture area concept was able to explain how culture traits diffuse to various parts.
