Fig: Leslie
wave

2) They accepted that traits are shared through diffusion

Contributions

1) V G Childe - gave evolutionary scheme in his work Social Evolution

Period

Palaeolithic
Neolithic
Copper
Bronze

Evolution

Savagery
Barbarism
Higher Barbarism
Civilization

- also argued that technology also contributed to evolution

2) Leslie White - 'The Evolution of Culture'

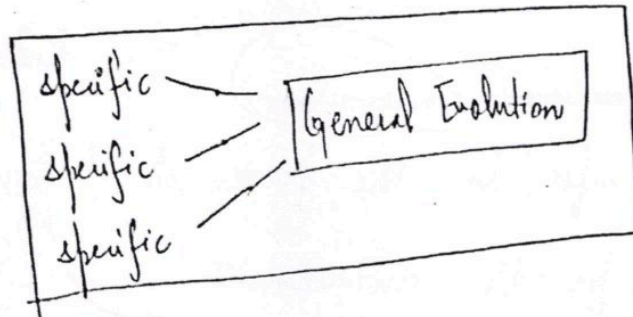

- gave the concept of 'energy-capture system' and law of cultural development
- $E \times T = C$ (E = energy, T = technology, C = cultural development)
- argued that more efficient ~~Energy~~ technology results in increased energy capture, hence more cultural development.

3) Julian Steward: 'The Theory of Cultural Change'

- gave three models of evolution - unilinear, universal, multilinear.
- developed the concept of 'cultural ecology'

4) Sahlins & Service $\Rightarrow$ 'Evolution of Culture'

- gave the concept of general and specific evolution

Criticism

- 1) ~~V. G. Childe~~ criticised for relying too much on archaeological history of Egypt.
- 2) Leslie White criticised for focusing too much on materialism and ignoring environmental impact.
- 3) ~~Julian Steward~~ criticised ~~for~~ by Malvin Harris - who termed 'culture ecology' as an anthropological gospel.
- 4) Sahlins & Service criticised for ignoring the integrational approach.

~~Despite this, no evolutionary school contributed immensely to anthropological theories.~~
