this margin(c) Critically examine the primary themes in postmodernism

Post modernism is an anthropological theory which emerged in late 20th century challenging the objectivity and ~~also~~ ethnographic ~~are~~ methods.

Basic concepts

1) Post modernists argue that reality is plural, hence objectivity cannot be achieved while doing ethnography

3) As per post modernists, the truth and facts on which ~~society~~ is based on science. Science in turn is controlled by political elites. Hence, there is need to deconstruct.

4) Noam Chomsky argued that media is controlled by elites who ensure 'manufactured consent'

Criticism

1) Spino: Post modernists cannot convincingly question the objective method used in anthropology

- 2) Bob McKinley: post modernists more of a religion than science.
- 3) Ray Andrade: objectivity is in fact possible in anthropology and in no way is dehumanising.
- 4) Roseneau: post modernists are themselves not consistent in criticizing the objectivity in anthropology.
- 5) Greenwich: post modernism further political agenda which renders it useless for practical utility.

Despite criticism, post modernism helped in increased increasing heightened sensitivities to towards ethnographic data collection.
