e) Socio-Linguistics and Ethnography of Communication

Socio linguistics studies the influence and change in language with social cultural factors like caste, gender, class, etc.

Socio Linguistic and Ethnography of Communication:

→ factors like class aspiration influence the speech of people.

Ex: MN Srinivas in his concept of Sanskritisation observes the change in speech of lower cast caste to claim higher status.

→ Similarly, cultural upbringing leads to different language codes

for both man and woman in
society.
