

Section A**Q.1)** Write notes on the following in **150** words**10*5=50****1.a)** Linguistic relativity principle

Linguistic relativity principle was given by Sapir-Whorf, as the Sapir-Whorf hypothesis

① It is based on the idea that language shapes our world view and our understanding of everything.

(eg) Study of Kuk Thaiyore → Don't have words for cardinal directions of North-South-East-West. So, typical understanding of directions.

② It coerces our thought process and limits our understanding of the world.

(eg) Yucatee Maya don't have words for counting specific items unlike English numbers ⇒ so cannot count no. of items

③ It shapes our reality and how we perceive things.

eg. John Lucy → Finnish have 2-D language
whereas Swedish have 3-D. Finnish
have more accidents

Principles to study language

Study children's
concept development

Under experimental
conditions

eg. Child acquisition
of language shows it

Hebrew is more gendered

language → children acquire gender
difference quicker (Alexander Lurija)

Criticisms

① ~~why~~ ^{How} ~~do~~ bilingual people able to
think if language is coercive?

② Extreme relativism.

③ No empirical methods of study

Sapir-Whorf highlighted the importance
of language in shaping our understanding
of culture.
