

(Don't Write
anything in this Area)**Section A**

Q.1) Comment on the following in about 150 words each:

10x5=50

(a) Questionnaires and Schedules

Questionnaires are the quantitative data analysis tool, wherein the researcher is asking the questions in his/her absence.

It is of two types :-

→ Open Ended : Participant is free to write whatever he/she feels like.

→ Closed ended : → specific questions and their answers have to be written.

eg : ⇒ feedback form.

Examples of Questionnaire

① The matters asked on any survey done by Company, Ngo or any Civil society.

② Central statistical institute ask for the answers from public.

③ My Gov. in $\Rightarrow$ Public opinion $\Rightarrow$ open ended like recently, Hon'ble PM Modi asked theme for Independence day.

Schedules

These are data collected in the presence of the researcher.

Example

$\rightarrow$ Mead data on the Samoan girls

$\rightarrow$ Malinowski data on the Trobrianders.

Merits

$\rightarrow$ it focus on the Cross cultural comparison.

$\rightarrow$ try to give measurable data as it is quantitative.

Demerits

$\rightarrow$ lacks subjectivity.

$\rightarrow$ Manipulation either by Researcher or the participant.

Therefore, triangulation of data is need both ¹⁴⁶³ qualitative & quantitative.
