7.b) How has interpretation and presentation of data changed from classic to contemporary writings in anthropological texts. (15 Marks)

The interpretation of data has the impact of the ideology, thought and socio-political dynamic of different eras from classical to contemporary times.

Interpretation of data changed from classical to anthropological by :-

(i) Arm chair anthropologist interpreted data from colonial or western lens → gave the universal and permanent evolutionary pattern

↳ Savagery → Barbarism → Civilization.

(ii) For these scholars, [western world] is the advanced and more developed.

(iii) Fieldwork started but with Verandah work by WHR Rivers of Todas, Radcliffe Brown of Andamanese

(iv) Franz Boas came with Historical particularism and cultural relativism to understand and interpret culture in their social context. (Kwakiutl)

(v) Malinowski gave the functionalist idea with participant observation

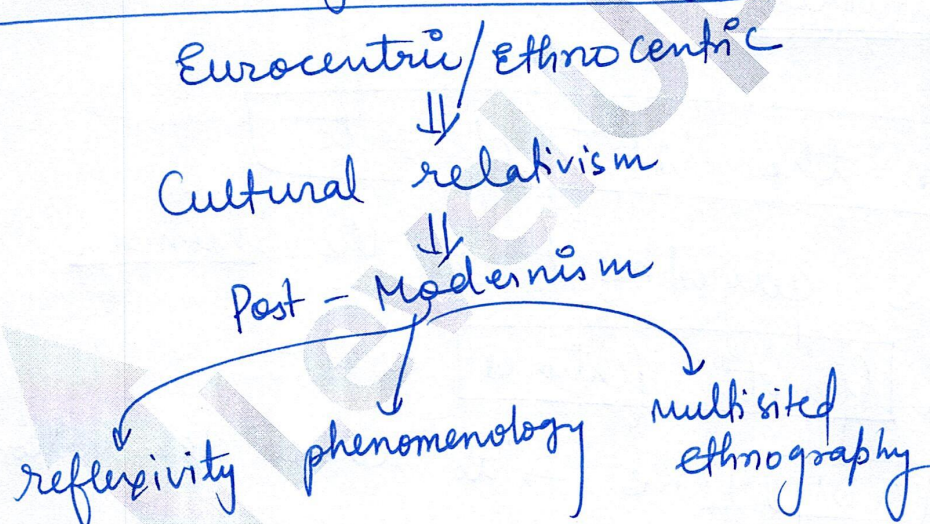

(vi) Mead, Benedict, & Cora Du Bois added the feminist layer, Division of labour.

(vii) Era of Symbolic interactionist
↳ Clifford Geertz → Verstehen
→ Hermeneutics
→ Thick description

(viii) Deconstruction of text by Jacques

- Deerrida → gave too much subjectivity
- (IX) Focus on new tool like Atlas.ti,
One Note, Nvivo for field work.
- (X) Triangulation of data → data,
research, method, theories etc.

Presentation of data changed

It has moved from diary based to
use of AI, Netnography and
statistical cross cultural comparison.

Thus, we can see that analysis
of data represents the theories
of those era from classical to
Contemporary times.
