SECTION - B

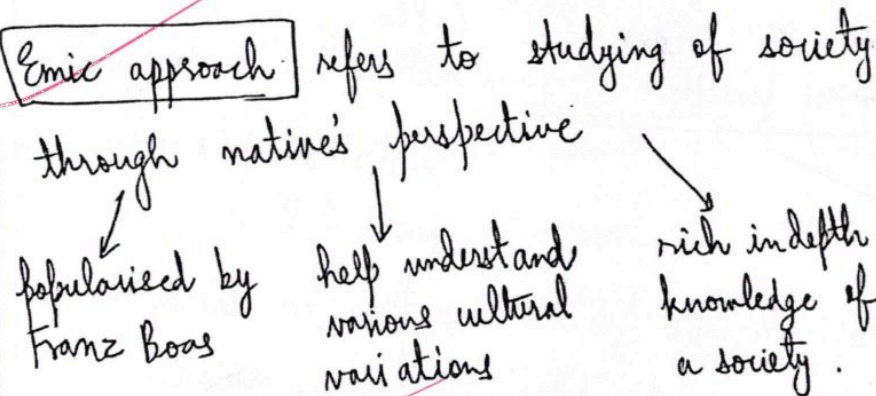

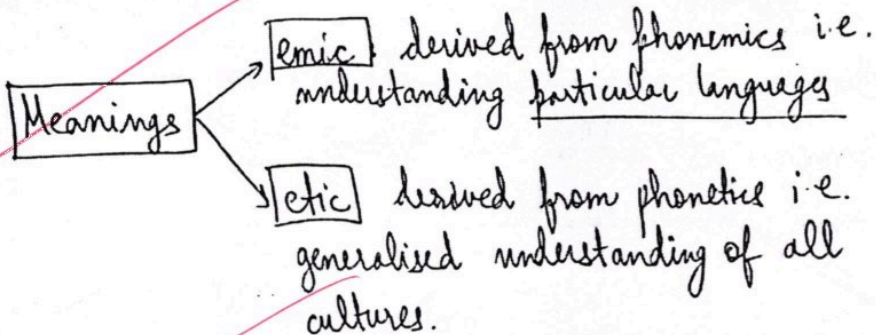

Q5. Write notes on the following in about 150 words each

10x5=50

10

(a) Write a note on *Emic and Etic* perspectives in Anthropology

Kenneth Pike coined the ~~ex~~ term *emic* & *etic*.

Etic approach is refers to studying of society through observant's perspective.

* The etic approach was championed by Malvin Harris in his theory of cultural materialism

↳ He argued etic approach is more generalised, scientific and rational than emic approach.

Emic approach

- 1) studying from native's point of view
- 2) led to cultural relativism
- 3) good grasp of native's culture

Etic approach

- 1) studying from observer's point of view.
- 2) led to ethnocentrism
- 3) Generalisations with respect to culture.

Despite differences, both etic and emic approach helped anthropologists in devising various anthropological theories.
